GespageRicoh v2.4.3: 27th February 2024

New features
- Document print release security enhancements
    - Introduced a new setting 'Action for suspended jobs' in Ricoh eTerminal's general configuration. This allows administrators to specify actions for print jobs suspended upon user logout, improving handling during situations like paper shortages.
        - 'Delete' (Default): Suspended documents are automatically cancelled, bolstering document confidentiality.
        - 'Continue': Suspended documents are preserved and will be released once issues are resolved, such as refilling paper.

Bug fixes and small enhancements
- Resolved an issue causing the Gespage login screen to freeze with a 'Please wait' message.
- Enhanced display for the default scan destination in the Gespage scan menu.
- Improved eTerminal app locale support, allowing the use of custom locales beyond the provided MFP defaults.
- Updated the Gespage application display name on Ricoh devices (***Gespage)***
